Conservation Seed Mixes

Forage 365

Year around attraction! KOPU II is high yielding, persistent, and extremely graze tolerant. Pure clover stands offer high quality forage for longer periods of time than mixtures. Stand will last three or more years with proper maintenance.

- KOPU II White Clover
- Starfire Red Clover
- Kenland Red Clover
- Berseem Clover
- Alsike Clover

Fast Cover Clover

Mixed specifically for the soil conditions in our region. This mixture will provide an excellent forage even on infertile soils with low pH. Stand will last two or more years with proper maintenance. Establishes very fast, will grow well with a half day of sunlight. Plot requires minimal fertilizer, perfect for remote food plot sites.

- Crimson Clover
- Kenland Red Clover
- Starfire Red Clover
- Berseem Clover

Chicory/Clover Maxx

This mixture contains chicory and high quality clovers. Chicory is an herb that is favored highly by deer. The chicory plant provides essential minerals for antler growth. This stand performs excellent in most soil conditions and during drought. Stand will last three or more years with proper maintenance.

- KOPU II White Clover
- Starfire Red Clover
- Kenland Red Clover
- Six Point Chicory
- Alsike Clover
- Berseem Clover

Fall Attraction

A perfect balance of annual clover and brassica to create a powerful draw. This stand will provide an excellent plot for archery, and will stay attractive well into late gun season. High yielding stand that can produce more than three tons of food per acre. I guarantee that deer will walk through other forages to feed on this!

- Crimson Clover
- Purple Top Turnip
- Forage Rape

Winter Tubers

A fantastic annual winter forage! After the first hard freeze starches in the plant begin converting into sugars, making it highly desired by deer. This forage is extremely palatable and very high in crude protein (20-30%). Yields 4-6 tons of food per acre, a powerful late season attractant.

DO NOT OVERSEED THIS PRODUCT....5 LBS. TO THE ACRE!

- Vivant Forage Brassica
- Purple Top Turnip
- Rangiora Forage Rape
- Appin Forage Turnip
- Essex Rape

Flash Mix

An annual mix that can be planted any time during growing season. Grains add organics to the soil, and legumes build soil nitrogen for the next year. Great choice for a first year plot. Will help to condition the site for next seasons perennial seeding.

- Appin Turnip
- Grain Rye
- Forage Oats
- Forage Rape
- Berseem Clover
- Crimson Clover
- Bobwhite Soybean

Game Bird Forage & Cover

An annual mixture for attracting game birds and wild turkey. Plot is favored by deer too! Stand will provide attraction for one full year. As the plants are growing, wildlife will eat the tender leaves. Then, into winter and the following spring they will consume the seeds from the plants. Plot becomes a turkey magnet the next spring.

- Bobwhite Soybean
- Buckwheat
- Austrian Winter Pea
- Forage Rape
- Dwarf Sorghum
- Black Oil Sunflower
- White Proso Millet

PBO Hammer Mix

Great for a early or late season seeding. Yields are good even when planted in late September. This annual mixture will keep them digging all winter long. A favorite of PBO Outdoors Television Pro Staff!

- Austrian Winter Pea
- Purple Top Turnip
- Forage Rape
- Crimson Clover
- Winter Rye
- Buckwheat
